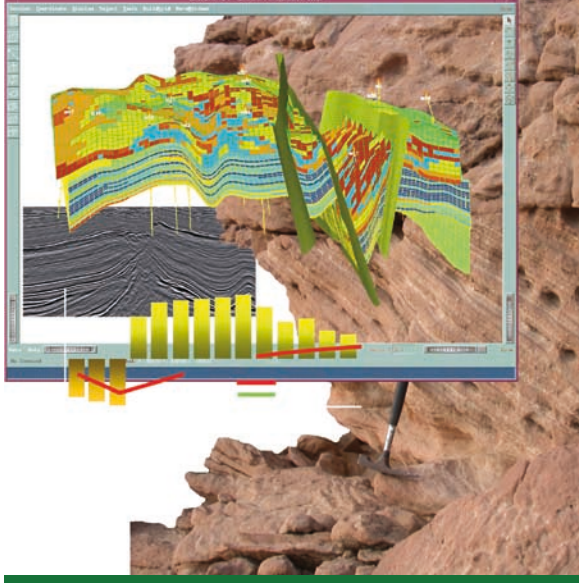
Beicip-Franlab

An Independent Worldwide Leader in Oil & Gas Consultancy and Advisory Services



Beicip-Franlab Oil and Gas Consultancy Services provide a comprehensive range of technical consulting and advisory services with the committed approach of providing fit-for-purpose project solutions implemented on a collaborative basis with our clients:

- International Oil and Gas Companies;
- National Oil Companies;
- Government Ministries and Organizations;
- Regional and Multilateral Development Agencies;
- Investment Banks and Financial Institutions;
- Businessess with Operations in the Oil & Gas Industry.

Our services are dedicated to the Oil and Gas cycle and encompass exploration, appraisal, development, production and refining:

- Geological, Geophysical and Geochemical Studies;
- Reservoir Engineering, Simulation and Optimization Studies;
- Integrated Oil and Gas Field Studies;
- IOR and EOR Studies;
- Specific Studies addressing a variety of skills and technologies such as seismic reservoir characterization, characterization and modeling of fractured reservoirs, basin modeling and prospect generation;
- Economics, Strategy and Contractual Services;
- Reserves Estimation and Asset Evaluation;
- Refining and downstream activities.

Our renowned commitment to excellence and delivery of thorough competency directly results from the talent, experience and development of our technical staff that includes continuous training programs to keep out our professionals current with the state-of-the-art techniques to best cope with the challenging and ever-changing environment of the oil & gas sector.

BeicipFranlab

Beicip-Franlab's reputation has been earned by consistently excelling in its performance and the results for its clients:

- **References with over 500 clients in more than 100 countries.**
- **Staff of more than 200 highly qualified experts in geology, geophysics, reservoir engineering, economy, software engineering and refining.**
- **Provision of multi-disciplinary and innovative approaches utilizing the "Institut Français du Pétrole"(IFP)'s proven Research & Technology deliverables.**
- **Recognizing every client's specific requirements and delivering practical results.**
- **Development of a Teamwork approach, utilizing joint studies, technology transfer, on-the-job-training, joint software development.**

EXPERTISE, PROFESSIONALISM AND INDEPENDENCE

For a number of decades, Beicip-Franlab has been able to develop close-knit and well-established relationships with its clients all over the world. Our technical staff always work closely with customers to deliver unique solutions in the operational time frame.

Our experience is sustained by a close technical collaboration with our parent organization, IFP (Institut Français du Pétrole), a leading research institute that has been conducting leading edge applied research for the oil and gas and related industries for sixty years.

Beicip-Franlab is committed to continuous development and evolution of our methods and software technologies, validating that technical innovation and professional skills are the key drivers for the missions undertaken by the firm.

Beyond this synergy with IFP, the financial autonomy and profitability of Beicip-Franlab ensures its independence from other service and oil & gas companies. Our revenues are generated exclusively from contracts obtained from our worldwide clients.

Dedicated staff, continuous development, reliability, trust and independence are the foundation for choosing Beicip-Franlab.

SUCCESS STORIES

- Successful integrated reservoir studies for numerous world-class giant fields.
- Proven exploration records based on IFP basin modeling technology and leading edge geology & geophysics interpretation.
- Consultancy leader and technology pioneer in fractured reservoir characterization and modeling.
- Seismic reservoir characterization studies successfully applied in various challenging environments.
- Bankable feasability study for refining projects.
- Establishment of collaborative relationship with industry through technology transfer, joint studies, on-the-job-training and long term technical partnership, joint software development.
