Junior Reservoir Engineer

.....

Job Overview

Beicip-Franlab is a world leading consulting Company providing software and services to the oil and gas industry, is seeking Junior Reservoir Engineers to further strengthen its reservoir team.

Beicip-Franlab core activity is to help oil and gas professionals interpret subsurface data and assess exploration and production risks and opportunities. A successful candidate will be expected to work directly in an integrated project team composed of geophysicists, geologists and reservoir engineers.

Daily tasks will include production performance analysis, building of dynamic simulation models to optimize client's development strategies. The candidate will use the Company's innovative reservoir simulation software as well as other standard industry tools.

He/she will be based in our main office near Paris in France with opportunities to travel abroad. The role is ideally suited for candidates who wish to:

- work in a dynamic and motivating environment
 - seek opportunities to work on a wide range of fields and technical challenges
 - take early responsibilities
-

Responsibilities

The successful candidate will report directly to the Project Leader and will be expected to:

- perform basic reservoir engineering analysis, material balance, dynamic simulation studies (model initialization, assisted history matching and performance prediction), and uncertainties estimation
- work actively in an integrated project team (with geophysicists, geologists and reservoir engineers)
- report to the Project Leader regularly on project advancement
- be able to present results to the clients
- apply new methods and be creative in optimizing field development using leading edge technologies and tools

Preferences

The successful candidate will have:

- An Engineering degree
- First experience (training period / first experience) in the Oil & Gas industry, an advantage
- A commitment for mobility as the job may include short and long-term missions overseas
- Strong interpersonal and communication skills, written and oral
- A confident and assertive personality with the ability to provide effective technical leadership and articulate strong technical arguments
- Fluent English mandatory. Spanish/ French, an advantage

Career

- Project Manager of an integrated exploration or field development project
- Team Leader of a group of reservoir engineer specialists
- Expert in Reservoir Engineering (simulation, reserves evaluation, ...)
- Business Development Manager
- Software support and sales specialist

Package

This position will be well rewarded and will include bonuses as well as personal training opportunities and other benefits.
