

Exploration Software User Meeting

October 17&18, 2016 - Paris, France

We are pleased to invite DionisosFlow and TemisFlow current and prospective users to join Beicip-Franlab 2016 User Meeting on stratigraphic and petroleum system modeling!

This two-day event, to be held in Rueil-Malmaison, will be an opportunity to share knowledge, workflows, recent case studies and discuss future developments around DionisosFlow and TemisFlow.

Here is a little taste of the agenda that will be detailed in the coming weeks:

October 17: Forward Stratigraphic Modeling

Morning: DionisosFlow 2016 & Future Developments

- Review of DionisosFlow 2016 technical content
- Overview of DionisosFlow 2017
- The future: presentation and discussion
 - New generation simulator
 - Organic matter deposit
 - Water tables and implications (lacustrine and terrestrial, diagenetic processes, etc.)

Afternoon: Best Practices & Case Studies

- Frontier exploration
- Subtle trap identification in mature basins
- Evaporites modeling
- DionisosFlow at reservoir scale

Group discussion: Well and seismic data integration and calibration in stratigraphic models

October 18: Basin & Petroleum System Modeling

Morning: TemisFlow 2016 & Future Developments

- Review of TemisFlow 2016 technical content
- Overview of TemisFlow 2017
- The future: presentation and discussion
 - Complex tectonics (Kronos Project)
 - Paleo-climate prediction
 - Modeling of biogenic gas full cycle
 - Three-phase flow

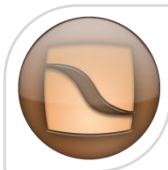

Afternoon: Best Practices & Case Studies

- Thermal modeling of hyper-extended margins
- Salt restoration
- Pore pressure prediction
- Play & prospect assessment

Group discussion: Uncertainties in basin modeling

Call for talks

Other technical presentations are welcome!

Registration is free, travel and lodging expenses at participant's charge.
